Education

Vellore Institute of Technology — Bhopal, MP, India
Bachelor of Technology in Computer Science Engineering; GPA: 8.60 — *August 2023 - July 2027*

Relevant Coursework: *Object Oriented Programming, Databases, Linux, Data Structures and Algorithms, Operating Systems, Computer Architecture.*

Skills Summary

- **Specialisation:** Data Structures and Algorithms
- **Languages:** Python, C++, Java, C
- **Database:** PostgreSQL, MySQL, SQLite
- **Platforms:** Linux, Windows
- **Currently Learning:** Data Science (Pandas, NumPy, Matplotlib, Scikit-learn, Machine Learning concepts, OpenCV)

Projects

Stock Market Predictor | *Python, Streamlit, yfinance, Matplotlib*

- Developed a web-based application to analyze and visualize historical stock data using the yfinance library.
- Enabled users to input stock tickers and date ranges to generate dynamic charts for Open, Close, High, and Low prices.
- Integrated Streamlit for a user-friendly UI and matplotlib for effective data visualizations.
- Delivered a real-time financial analysis tool entirely built with Python and Yahoo Finance APIs.

Face Recognition System | *Python, OpenCV, face_recognition, Flask*

- Created a real-time face recognition system using dlib and face_recognition libraries.
- Implemented blink detection as a liveness check to reduce spoofing.
- Built a Flask web interface for user management and secure login with SQLAlchemy.

Plant Disease Detection | *Python, TensorFlow, Keras, OpenCV*

- Developed a CNN-based model to identify plant leaf diseases with over 90%
- Trained on augmented datasets and applied preprocessing for robust performance in real-world conditions.
- Integrated a simple UI to make the tool accessible for field use.

Certifications

Programming in Java – Vityarthi, VIT Bhopal University
Completed: 15 April 2025

Python Essentials – Vityarthi, VIT Bhopal University
Completed: 29 March 2024

Fundamentals of AI and ML – Vityarthi, VIT Bhopal University
Completed: 15 December 2023
